MCUBS MidCity Investment Corporation

Notes: For Loan 1 and 3, although borrowing contracts are based on variable interest rates, we intend to enter into interest rate swap agreements to fix the interest rates on or before the anticipated borrowing dates. The base interest rate applied to the calculation period of Loan 1,3 and 7 interests to be paid on the interest payment date will be the 3 -month Japanese yen TIBOR on a day two business days prior to such interest payment date. If such calculation period is less than three months, the base interest rate will be calculated using the methodology stipulated in the loan agreement. For JBA Japanese yen TIBOR, please check the website of JBATA (http://www.jbatibor.or.jp/). Interest rates applied to oan 1 to 6 will be notified later upon determination.
2. Interest payment dates are the last business days of January, April, July and October of every year and the principal repayment date (the next business day if the corresponding date falls on a non-business day, and the preceding business day if such next business day is included in the next month).
3. Average remaining borrowing period is calculated using the weighted average of the borrowing amounts.

## 2. Reason for Borrowings

The fund will be used for the repayment of $¥ 15,300$ million borrowings which will be due on July 31,2018 . MCUBS MidCity will strive to improve the stability of its financial base by extending borrowing periods.

Notes:

1. The loan agreement provides for a floating interest rate. We concluded an interest-rate swap agreement to fix the interest rate.
2. Mitsubishi UFJ Trust and Banking Corporation transferred its domestic corporate loan-related businesses to MUFG Bank, Ltd. through the absorption-type corporate split on April 16, 2018, and MUFG Bank, Ltd. has succeeded the position of Mitsubishi UFJ Trust and Banking Corporation as the lender to domestic corporate loans.
3. Average remaining borrowing period is calculated using the weighted average of the borrowing amounts.
4. Status of interest-bearing debt after the Borrowings (As of July 31, 2018)

Average remaining years of the interest-bearing debt ${ }^{\text {(Note 1) }}$

Notes:

1. Average remaining years of the interest-bearing debt is using the weighted average of remaining years of the interest-bearing debts until maturity based on the respective balance of the interest-bearing debts.
2. As of today, the remaining years of the interest-bearing debt of July 31, 2018 and Dec. 2018 ( 25 th period) are calculated assuming that there is no new borrowing, refinancing and prepayment after the Borrowings to December 31, 2018. A difference may be created between the assumptions and actual conditions according to changes in situation of debt financing etc., and as a result, the actual remaining years of the interest-bearing debt may differ from the above forecast.
